Kubernetes Community Days is an event bringing together the Cloud Native Community to learn, build networks, collaborate and share about various Cloud Native projects. **Kubernetes Community Days is supported by Cloud Native Computing Foundation (CNCF)** and organized by the region community group or community group leaders.

Kubernetes & Cloud Native Indonesia Community wants to be the initiator of Kubernetes Community Days from CNCF as there has never been one yet in **Indonesia**, and there is no cloud/infra conference yet apart from Open Infra from OpenStack. Our community wants to facilitate Indonesian infra engineers / enthusiasts (can be students) across the country to **share, network, learn**, and help grow the tech community to **the next level**.

This year, Kubernetes Community Days will be held for the very first time in Indonesia on **November 27, 2021 virtually** due to COVID-19 situation. This event is organized by the Kubernetes & Cloud Native Indonesia Community. This will be a one day conference with multiple session tracks, lightning talks, keynote, and invited guest speakers. We targeted around **500 people** to join the conference.

**CLOUD NATIVE
COMPUTING FOUNDATION**
